NOTICE TO ESPANOLA HYDRO ELECTRICITY CUSTOMERS

1. kWh consumption is adjusted upwards by the system total loss factor of 1.0724. For primary metered services the total loss factor is 1.0617. (Effective January 25, 2007)
2. For a non-interval meter, kW is the customer's peak demand at any time of the month.
3. For an interval meter, kW is the customer's peak demand occurring between 7AM and 7PM on weekdays excluding statutory holidays.
4. Designated customers are defined by Provincial Legislation.
5. The price threshold for residential consumers will change twice a year. The threshold will be 1000 kWh per month during the winter season (November 1 to April 30) and 600 kWh per month during the summer season (May 1 to October 31). The price threshold for non-residential consumers will remain at 750 kWh per month for all seasons.

Late Payment Charge - a monthly late payment charge of 1.5% shall be applied to any outstanding amount after the due date.

GLOSSARY OF TERMS

Electricity

This is the cost of the electricity supplied to you during the billing period and is the part of the bill that is subject to competition. The electricity consumed is multiplied by the adjustment factor*. Espanola Regional Hydro collects this money and pays this amount directly to our suppliers.

*When electricity is delivered over a power line, it is normal for a small amount of power to be consumed or lost as heat. Equipment, such as wires and transformers, consumes power before it gets to your home or business. The adjustment factor accounts for these losses.

Delivery

These are the costs of delivering electricity from generating stations across the Province to Espanola Regional Hydro then to your home or business. This includes the costs to build and maintain the transmission and distribution lines, towers and poles and operate provincial and local electricity systems.

A portion of these charges are fixed and do not change from month to month. The rest are variable and increase or decrease depending on the amount of electricity that you use.

Regulatory Charges

Regulatory charges are the costs of administering the wholesale electricity system and maintaining the reliability of the provincial grid.

Debt Retirement Charge

The debt retirement charge pays down the debt of the former Ontario Hydro.
